DETAILED ACTION

This Office Action is in response to the election filed 15 June 2005.

Election/Restrictions

Claims 17-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method of making a semiconductor device, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 15 June 2005.

Applicant's election without traverse of claims 1-16 in the reply filed on 15 June 2005 is acknowledged.

Drawings

Figures 1a-1d should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a shoulder having a pair of shoulders must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4,8 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how one shoulder is going to have a pair of shoulders; the specification does not disclose this limitation. It is disclosed that the shoulder is the etched area of the conductive layer and if that is the case it is unclear how an etched area on one side of the conductive layer has a pair of shoulders or etched areas.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,2,5,6,9,10 and 13-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Kwon et al. (U.S. Publication 2004/0219715).

Kwon discloses a semiconductor device (Figs. 6 and 9) that contains a substrate (100) comprising circuits (180), a plurality of conductive bumps (220) provided in adjacent relationship to each other on substrate in electrical contact with circuits and having upper surface, pair of sidewalls, an outer wall and inner wall, a conductive layer (230/180(on top of bump Fig. 9)) made of gold (Au) provided on plurality of conductive bumps wherein conductive layer is absent from both sidewalls and inner wall and a protection layer (190) provided on substrate adjacent to rows of plurality of conductive bumps and a test probe pad (210 that extends on the substrate past the bump).

Claims 1-3,5-7,9-11 and 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Kobayashi (U.S. Publication 2003/0183933).

Kobayashi discloses a semiconductor device (Figs. 3a and 19) that contains a substrate (3) comprising circuits (13), a plurality of conductive bumps (10) provided in adjacent relationship to each other on substrate in electrical contact with circuits and having upper surface, pair of sidewalls, an outer wall and inner wall, a conductive layer (1) made of gold (Au) provided on plurality of conductive bumps wherein conductive layer is absent from both sidewalls and inner wall, a protection layer (105) provided on substrate adjacent to rows of plurality of conductive bumps and a shoulder (etched area of the conductive layer 1 so it does not completely cover the bump) at the upper surface of the bump.
